About the project

We welcome you to the 4th newsletter of the EnterSchoolMind project. This project aims to cultivate the entrepreneurial mindset in elementary schools through a holistic approach targeting teachers and pupils.

This newsletter provides a progress update.

Overview of IO6 - Assessment of Teachers

IO6 involved creating an assessment tool for the teachers' Entrepreneurial Assessment. This was to be used to assess the competences of teachers in Entrepreneurial mind-set.

The consortium needed to develop one assessment tool for each of the competences, culminating in 8 small as-

essment tools in total.

The structure of the assessment was created in accordance with the certification scheme for assessment (IO3), and included a mix of multiple choice questions, scenario based multiple choice questions and a longer case study question to assess the knowledge,

skills and competences of the teachers who undertook the teacher training in IO5.

The partners responsible for the 8 competences: MMC, Dimitra, Rinova and FH Joanneum designed a pool of questions and case studies. These were then selected by the Cyprus Certification

Company who were leading the certification and assessment process.

The school partners: 15billionebp, Apostolos Varnavas Primary School & 4th Primary School of Tirnavos organised dates with the CCC for the teacher assessments to take place.

With the support of the
Erasmus+ Programme
of the European Union

Certification & Assessment Process

Once each partner developed the assessment for their competences the assessment content was translated into all the languages of the consortium. MMC, FH Joanneum and 15billionebp led the translation of the assessment materials.

The Cyprus Certification Company led the certification of the teachers' entrepreneurial assessment tool. Certification was completed in

accordance to the assessment certification scheme (104). This included developing all the documents for assessment registration and examiners documents.

MMC designed a train the master examiner workshop and trained 4 examiners from the consortium.

The assessments took place in March 2021 over Zoom. Teachers taking the assessments joined a zoom call, showed their ID and logged into Moodle to complete the assessments. The CCC oversaw and invigilated the assessments in real time over Zoom.

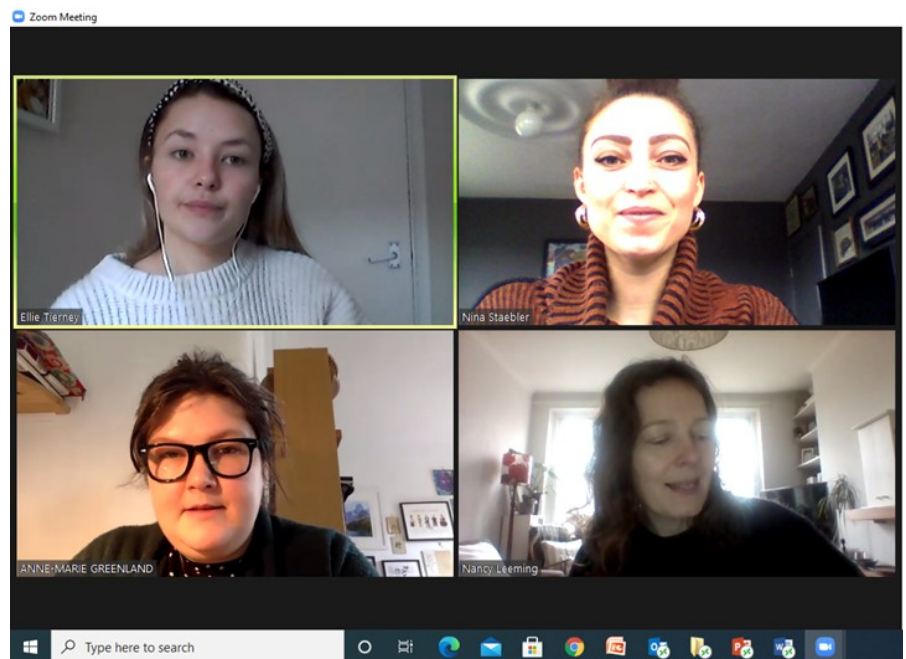

Teacher Assessments in UK

15billionebp pilot tested 3 competences in the UK: Working with Others, Motivation & Perseverance, and Self-Awareness & Self-Efficacy.

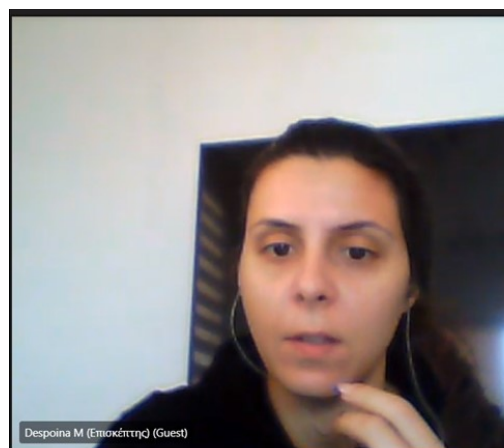

7 teachers took part in online assessments for the 3 competences.

Feedback was positive across all countries that the assessment met its aims and adequately assessed the learning from each competence.

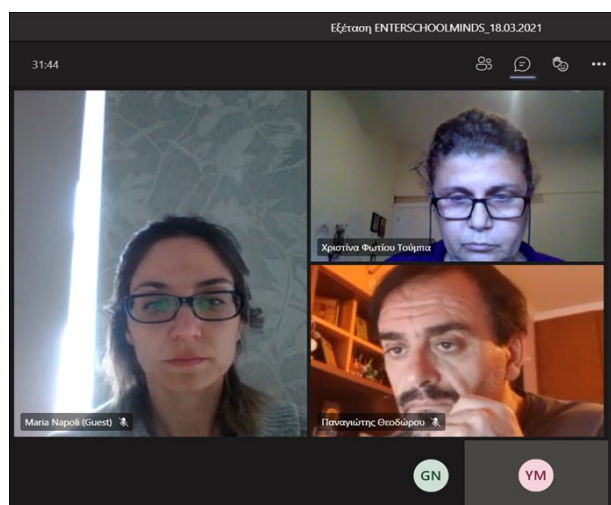

Teacher Assessments in Greece

7 teachers from the 4th Primary School of Tyrnavos were assessed on 3 competencies: creativity, working with others and learning through experience.

Teacher Assessments in Cyprus

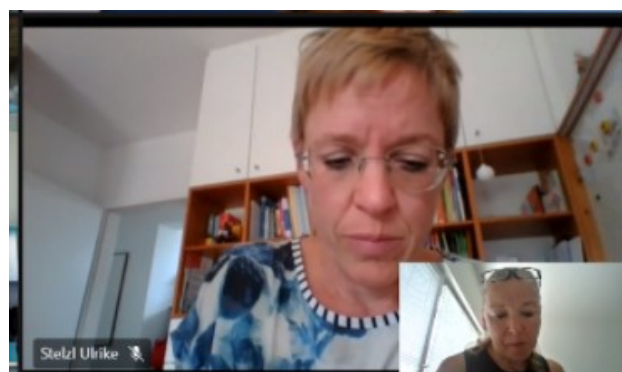

CCC in collaboration with MMC pilot tested assessments for 8 competences: Coping with uncertainty, creativity, self-awareness & self-efficacy, motivation & perseverance, planning & management, sustainable and ethical thinking, working with others and learning through experience. Teachers from Apostolos Varnavas Primary School as well as teachers from other schools all over Cyprus participated in the assessment.

Teacher Assessments in Austria

FH Joanneum pilot tested 3 competences: Learning through experience, Creativity and Working with others.

They pilot tested the assessments with 3 teachers.
